

AP Statistics
Summer Work

Welcome to AP Statistics! In AP Statistics, you will be collecting, analyzing, and drawing conclusions from data. You will use technology, problem solving, and writing throughout the course. Your summer work is going to prepare you for a great start in AP Statistics.

1. The purpose of this summer work is to review some basic topics as well as introduce you to some of the statistical capabilities of the graphing calculator. To be successful, you must be comfortable with the tools we will use throughout the year. It will also teach you the basic vocabulary and concepts that we will see in the first several units of the class.
2. A TI-84 calculator is required to complete some of the work in this packet.
3. The packet along with four videos are posted on Google Classroom.

The class code is: [bvgesm43](#)

4. This packet will be turned in on the first day of class in August, so please don't wait until the last minute to begin working on this packet. This will be your first grade for the course.

I am looking forward to a great 2025-2026 year in AP Statistics!! Please email me if you have any questions over the summer. Enjoy your summer!
